This book provides a comparative study of contract law, examining the interaction of common law and civil law approaches to contract law. Drawing extensively upon English, French and European law, the book explores how the law of contract of Jersey, Channel Islands, has been influenced by both civil law and common law sources. It is argued that this jurisdiction is a striking example of comparative law in action, given that Jersey contract law is made up of a blend of common law and civil law approaches. Jersey law is premised upon a subjective approach to contracts, in which civil law concepts such as cause (rather than consideration) and vices de consentement are the foundational aspects, but is nonetheless highly influenced by the common law in areas such as remedies (damages, termination, etc). The book analyses a series of key issues from a comparative and European perspective, including the principles underlying contract law (comparing and contrasting civil and common law approaches), the formation of contract, requirements of reciprocity (cause vs consideration), the structure and approach of precontractual liability, the role of good faith in a mixed system, the architecture of remedies, and more.

Written in a fresh and lively style and supported by a strong analytical framework, the sixth edition of Pearce & Stevens' Trusts and Equitable Obligations continues to provide students with a relevant and exciting examination of a subject that can seem remote and difficult. Revised diagrams and flow charts help to explain difficult topics such as the operation of the pari passu, first in, first out, and rolling charge methods of allocating funds between contributors and the circumstances in which strangers can be held personally liable as dishonest accessories to or knowing recipients of trust property in breach of trust. The authors take a modern and conceptual approach to the wide array of topics covered in undergraduate equity and trusts modules, helping students explore the many ways trusts impact on everyday life and in the world of finance and commerce. The text is accessible without compromising detailed critical comment, and engages with key issues such as the protection of privacy, enforcing informal promises, trusts and the family home, and assessing public interest in charities.
